Fabula
Team Agreement

Ugnius Vaičeskas, Haroldas Trinkūnas, Aistė Aškinytė, Artūras Ramoškevičius, Petras Maciulevičius

1. **Team name: Fabula; Leader: Ugnius**
   1.1. Why Ugnius? Everyone else declined (public voting on the proposed candidate(s));
   1.2. Why Fabula? The Latin word “Fabula” means “story” – and that is indirectly the mission of our project;
   1.3. What team leader is responsible for? Organize meetings, keep others accountable (essentially peer pressure).
2. **Team ambition.** To do the best we can (grade ~9).
3. **Key team rules**
   3.1. Don’t skip meetings (unless necessary (usually isn’t)) and do your part;
   3.2. Write understandable code and text; explain if necessary and make the changes;
   3.3. Keep others accountable;
   3.4. Communicate proactively; ask questions if something is unclear.
4. **Key principles governing work distribution**
   4.1. Be cordial;
   4.2. Skill matching;
   4.3. Accountability;
   4.4. Fairness.
5. **Capacity constraints**
   5.1. Keep meetings concise;
   5.2. No AI chat bots.
   5.3. Don’t assign too much work for one person;
   5.4. Consider other members constraints.
6. **Meeting times and group work**
   6.1. Every weekend, by default;
   6.2. Meeting times and mode (sync or async) will be agreed upon on Discord.
7. **Track progress**
   7.1. Real-time brainstorming, daily collaboration, and active presence within the team Discord server;
   7.2. GitHub Organization (To-do and tasks tracking)
   7.3. Verifiable code / document updates, pull requests, and codebase contributions tracked directly via commits (Overleaf, where applicable, and GitHub).
8. **Sanctions and punishment for breaking team agreements**
   8.1. Post funny TikTok online;
   8.2. 100 push ups in a row;
   8.3. Public humiliation in front of whole course;
   8.4. Public apology on LinkedIn.
9. **AI declaration.** NO AI for direct content (code/text) generation. It is used only as a side tool for questions. All content and ideas MUST be reviewed and approved by humans.

Fabula
Project Proposal

The goal of our team is to build an online messaging system for businesses. The main purpose of the system is to provide users (employees) with an environment where they can communicate, share information, manage their accounts and collaborate on tasks.
One of the main features of the platform will be multi-user messaging. Users will be able to communicate with each other through company channels. The messaging system will allow users to exchange information efficiently and quickly. It will also include features such as message notifications, pinning, editing and search.

Lastly, users will be able to manage their activity, and the managers of the channels will be able to manage and administrate all the text and call channels, as well as control user permissions, a secure and organized workspace.

Overall, the project aims to create a productive work environment for companies online by combining messaging and account/channel moderation.
